## **GENERAL INFORMATION**

We are pleased to invite you to participate in the **II International Scientific and Practical Conference on INNOVATIONS IN ENGINEERING AND TECHNOLOGY**. The conference serves as a platform for discussion of advanced and innovative technical solutions in various areas of modern science and technology.

The aim of the conference is to present the innovative approaches to developing convergent solutions in engineering and technology, and also in interdisciplinary scientific researches.

The conference's objective is to analyze and appraise innovative solutions in latest scientific researches in terms of applicability, performance, and prospects for the development.

Key topics of the conference cover priority research areas of technical and related sciences and take into account global trends in development.

## **CONFERENCE KEY TOPICS / SESSIONS**

1. Simulation, Automation, and Optimization of Production Engineering.
2. Material Science in Engineering and Technology.
3. Processing Equipment, Mechanical Engineering Processes and Metals Treatment.
4. Innovative Technologies in Developing Convergent Solutions in Engineering and Technology.
